Once your SMTP service is ready, you will need to configure Perception with the correct details. Configuring Perception to use the email settings requires some modification of the server settings.

Configure the SMTP service | Questionmark

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...
