Approved for organic use, Safer Brand® Insecticidal Soap is made from naturally occurring plant oils and animal fats. Penetrates the protective outer shell of soft bodied insect pests and causes dehydration and death within hours. Traps, which allow the pest to “check in but not check out” can effectively control wasps and a number of other pests.

Common Lawn Problems and Solutions | Planet Natural

Biological pest control is a method of controlling pests such as insects and mites by using other organisms. It relies on predation, parasitism, herbivory or other natural mechanisms, but typically also involves an active human management role. Classical biological control involves the introduction of natural enemies of the pest that are bred in the laboratory and released into the environment.
