The history of Artificial Intelligence (AI) began in antiquity, with myths, stories and rumors of artificial beings endowed with intelligence or consciousness by master craftsmen. The seeds of modern AI were planted by classical philosophers who attempted to describe the process of human thinking as the mechanical manipulation of symbols [citation needed].

When asked how students learn these qualities of an ideal graduate, teachers and administrators say that it sometimes happens in traditionally taught classrooms, but they acknowledge that it's inconsistent at best. Our workshop participants then go on to learn how project based learning (PBL) provides opportunities for students to build these qualities, as well as more deeply learn traditional ...
