Sea Life A-Z II Quiz - Sporcle

Your work will contribute to a long-term look at where the sea turtles go, both as populations and as individuals. As more Earthwatchers contribute their time, the researchers will develop a clearer and longer-range view of whether a group of turtles has vacated an area because of a change in conditions, for example, and of how individual turtles grow and move around.

Tracking Sea Turtles in The Bahamas

§112.31. Implementation of Texas Essential Knowledge and Skills for Science, High School. (a) The provisions of this subchapter shall be implemented by school districts.

In biology, regeneration is the process of renewal, restoration, and growth that makes genomes, cells, organisms, and ecosystems resilient to natural fluctuations or events that cause disturbance or damage. Every species is capable of regeneration, from bacteria to humans. Regeneration can either be complete where the new tissue is the same as the lost tissue, or incomplete where after the ...

Regeneration (biology) - Wikipedia

An endosymbiont or endobiont is any organism that lives within the body or cells of another organism in a mutualistic relationship with the host body or cell, often but not always to mutual benefit. The term endosymbiosis is from the Greek: ἔνδον endon "within", σύν syn "together" and βίωσις biosis "living"). Examples are nitrogen-fixing bacteria (called rhizobia), which live in ...
