Inventory Management Software & Inventory Control Systems

A document management system (DMS) is a system (based on computer programs in the case of the management of digital documents) used to track, manage and store documents and reduce paper. Most are capable of keeping a record of the various versions created and modified by different users (history tracking). The term has some overlap with the concepts of content management systems.

Comment by Rex AZ on September 7, 2015 at 11:51 am. I would like to have an inventory control system for a sports club in my vicinity. They have a bar, restaurant, swimming, hall rentals and other outlets that generate revenue, and I would like an admin control point to have higher level access than other users.
