Given the direction of the concentration gradient in active and passive transport examples, explain why active transport requires energy input by the cell. Membrane Structure and Function 7 33. With your group, complete the table below to show the difference between active and passive transport.

### **Membrane Structure and Function**

Some molecules, such as glucose, use gated channels as shown in Model 3; however, not all channels are gated. Some channels remain permanently open and are used to transport ions and water across the cell membrane. 22. Discuss with your group why the type of protein channel in Model 3 is called a gated channel.
