Educreations is a community where anyone can teach what they know and learn what they don't. Our software turns any iPad or web browser into a recordable, interactive whiteboard, making it easy for teachers and experts to create engaging video lessons and share them on the web. Students can replay these lessons any time, any place, on any connected device.

Problem Of The Month Level B Miles Of Tiles | Educreations

Miles of Tiles Brief Description: This exhibit consists of a magnetic wall and different polygons and shapes which the students use to create patterns and tessellations. Objectives: While students express creativity with the patterns they make at this open-ended exhibit, they learn about symmetry, tessellation, and two-dimensional geometry.

Miles of Tiles - Math Midway Home

Level D: You work for a tile manufacturing company. The company has over-stocked a certain set of tiles. There are three different tiles in this particular set. One is a large square tile, the second is a small square tile and the third is a rectangle. The length of the rectangle is the same length as one side of the large square.

Miles of Tiles - Digital Extensions for Kids

Answers. Best Answer: There are 12 inches in a foot. So if your floor is 12 feet from north to south (length), then 12 times 12 inches (144) tells you how many inches long the floor is. 4 goes into 144 thirty six times, so there are 36 four-inch tiles along the length of the floor. If your floor is 14 feet from left to right (width),...
