Each interactive concept-builder presents learners with carefully crafted questions that target various aspects of a discrete concept. There are typically multiple levels of difficulty and an effort to track learner progress at each level. Question-specific help is provided for the struggling learner; such help consists of short explanations of how to approach the situation.

Refraction is the bending of the path of a light wave as it passes across the boundary separating two media. Refraction is caused by the change in speed experienced by a wave when it changes medium. Lesson 1, focused on the topics of "What causes refraction?" and "Which direction does light refract?" In that lesson, we learned that light can either refract towards the normal (when slowing down ...

A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes. These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...

A plastic bottle is a bottle constructed from high density plastic. Plastic bottles are typically used to store liquids such as water, soft drinks, motor oil, cooking oil, medicine, shampoo, milk, and ink. The size ranges from very small sample bottles to large carboys. Consumer blow molded containers often have integral handles or are shaped to facilitate grasping.

Plastic bottle - Wikipedia

Is there any way to keep Oracle SQL Developer from closing my DB connections, or to increase the timeout? Sometimes during a long-running query SQL Dev will just close the connection, leaving my query running on the server but me with no results.
