The best benchmark remains your own application. I assume you have profiled it and know where it spends its time, and have optimised it where possible; running it will at least ensure that the machine, operating system, and compiler exist, a factor often overlooked amidst a profusion of numbers and promises.

Computer - History of computing: A computer might be described with deceptive simplicity as "an apparatus that performs routine calculations automatically." Such a definition would owe its deceptiveness to a naive and narrow view of calculation as a strictly mathematical process. In fact, calculation underlies many activities that are not normally thought of as mathematical.
