REGIONAL ANALYSIS CONTRIBUTIONS OF EASTERN AFRICA

The significance of extreme heat in Australia in terms of human mortality largely escaped public attention until Coates (1996) compared fatalities from different Australian natural hazards. This situation has changed: for example, Bi et al. (2011) provide an overview of the literature, the majority of which has either focused on individual extreme heat events, relatively short periods of time ...

The natural environment encompasses all living and non-living things occurring naturally, meaning in this case not artificial. The term is most often applied to the Earth or some parts of Earth. This environment encompasses the interaction of all living species, climate, weather and natural resources that affect human survival and economic activity. The concept of the natural environment can be ...

Toxic Medicines, Powders, Sprays Harm Pets. The FDA has released information concerning non-steroidal anti-inflammatory drugs (NSAID) for pets -- including Metacam, Deramaxx, Previcox and Rimadyl -- that shows they have been connected to 22,000 cases of illness in dogs, almost 3,000 of which were fatal!

Toxic Medicines, Powders, Sprays Harm Pets

Survival analysis is a branch of statistics for analyzing the expected duration of time until one or more events happen, such as death in biological organisms and failure in mechanical systems. This topic is called reliability theory or reliability analysis in engineering, duration analysis or duration modelling in economics, and event history analysis in sociology.
