Table 1 shows the areas and the security controls identified from the ISO 27799 (prefix 7 refers to Chapter 7 of the standard, in which these concepts are detailed), along with the questions formulated to consider each security control. Security controls define what is required in terms of information security in healthcare but not how these requirements are to be met.

An elevator (US and Canada) or lift (Commonwealth countries) is a type of vertical transportation device that moves people or goods between floors (levels, decks) of a building, vessel, or other structure. Elevators are typically powered by electric motors that drive traction cables and counterweight systems like a hoist, although some pump hydraulic fluid to raise a cylindrical piston like a jack.

Elevator - Wikipedia
