In this whitepaper, we discuss the aspects of complexity, how it impacts projects, programmes, and portfolios and what we can do about it. Drawing upon the emerging field of engineering systems, the paper helps us to understand the intricate nature of complexity, uncertainty, and human behaviour, covering both structural and dynamic dimensions.

Complexity Management for Projects, Programmes, and Portfolios

Production inefficiencies are caused by limited autonomy and human-robot interactions, leading to long cycle times and delays, low detection rates (Zhao et al., 2016) and inability to perform agricultural tasks in unstructured environments. However, although limited in number, some robotics applications are now commercially available.
