For some students, solving problems on ages is never being easy and always it is a challenging one.

HOW TO SOLVE AGE PROBLEMS STEP BY STEP
"Age" Word Problems (page 1 of 2) In January of the year 2000, I was one more than eleven times as old as my son William. In January of 2009, I was seven more than three times as old as him.

"Age" Word Problems - Purplemath | Home
A problem with one variable: How old is Al? Many single-variable algebra word problems have to do with the relations between different people's ages. For example: Al's father is 45. He is 15 years older than twice Al's age. How old is Al? We can begin by assigning a variable to what we're asked to find. Here this is Al's age, so let Al's age = x.
