PivotTables are great for analyzing and reporting on your data. And when your data happens to be relational—meaning it's stored in separate tables you can bring together on common values—you can build a PivotTable like this in minutes:

Use multiple tables to create a PivotTable - Excel
Consolidate data by using multiple page fields. You can create multiple page fields and assign your own item names for each source range. This lets you create partial or full consolidations; for example, one page field that consolidates Marketing and Sales apart from Manufacturing, and another page field that consolidates all three departments.

Consolidate multiple worksheets into one PivotTable - Excel
