Managed DNS service providers offer services on a monthly pay-as-you go basis or on a subscription basis. Lower tier small business plans support a relatively limited number of domains or queries per second (QPS) vs. corporate plans.

Top Managed DNS Services in 2019 | TrustRadius
DNS is a very popular and well known protocol. It is used for resolving host names and domain

names to IP addresses. The fact is that when you type www.firewall.cx the name is translated into an IP address via a number of queries that take place from your PC towards the DNS server. This DNS Query process (and more) is analysed in great depth in the articles that follow.

Domain Name System (DNS) - Firewall.cx

What are primary and secondary DNS servers? When setting up a DNS server, a server administrator has a choice of whether to designate a DNS server as a primary or a secondary server (also known as a slave). In some cases, a server can be primary for one zone and also secondary for another zone.. A primary server hosts the controlling zone file, which contains all the authoritative information ...

Primary Vs Secondary DNS | Cloudflare

Authoritative nameserver - This final nameserver can be thought of as a dictionary on a rack of books, in which a specific name can be translated into its definition. The authoritative nameserver is the last stop in the nameserver query. If the authoritative name server has access to the requested record, it will return the IP address for the requested hostname back to the DNS Recursor (the ...

What Is DNS? | How DNS Works | Cloudflare

The Domain Name System (DNS) is a hierarchical and decentralized naming system for computers, services, or other resources connected to the Internet or a private network. It associates various information with domain names assigned to each of the participating entities. Most prominently, it translates more readily memorized domain names to the numerical IP addresses needed for locating and ...
