June 2017. This is a list of recent ETS research publications. Within each category, citations are alphabetized by the last name of the first author.

ETS Education Research Update

Today's internet, accessed by fixed and mobile networks, allows us to transmit files, voice and video across the planet. With the emergence of an ultra-responsive and reliable 'Tactile Internet,' advanced techniques in robotics and artificial intelligence, we predict the emergence of an 'Internet of Skills' which allows the transmission of labor globally.

N-back is a kind of mental training intended to expand your working memory (WM), and hopefully your intelligence (IQ 1).. The theory originally went that novel 2 cognitive processes tend to overlap and seem to go through one central bottleneck.As it happens, WM predicts and correlates with IQ 3 and may use the same neural networks 4, suggesting that WM might be IQ 5.
